

Technologies - Computing science contexts for developing technological skills and knowledge

Fourth Level TCH 4-08a

I can work with others to plan and use a learning group for sharing experiences, ideas and information within a secure online environment.

Technologies - Computing science contexts for developing technological skills and knowledge

Fourth Level TCH 4-08b

I can compare different forms of security software to gain knowledge and understanding of their functions in protecting contemporary technologies.

Technologies - Computing science contexts for developing technological skills and knowledge

Fourth Level TCH 4-08c

I can integrate different media to create a digital solution which allows interaction and collaboration with others.

Technologies - Computing science contexts for developing technological skills and knowledge

Fourth Level TCH 4-08d

Through research, I can gain knowledge of computer systems or emerging technologies to understand their differing features and consider their suitability for the world of work.

Technologies - Computing science contexts for developing technological skills and knowledge

Fourth Level TCH 4-09a

By learning the basic principles of a programming language or control technology, I can design a solution to a scenario, implement it and evaluate its success.

Technologies - Computing science contexts for developing technological skills and knowledge

Fourth Level TCH 4-09b

I can create graphics and animations using appropriate software which utilise my skills and knowledge of the application.

Technologies - Computing science contexts for developing technological skills and knowledge

Fourth Level TCH 4-09c

I can use features of software to create my own animation which can then be used to create an animated sequence.
